| Manage interventional pain therapy utilizing drugs, regional anesthetic techniques or other accepted pain relief modalities |                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                |                   |
| Perform arterial puncture to obtain arterial blood samples                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                |                   |

| Privilege                                                                                                                                                                                                                                                                                                      | Newly Requested | Currently Held | Granted / Renewed |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|----------------|-------------------|
| Implementation of respiratory and ventilator care                                                                                                                                                                                                                                                              |                 |                |                   |
| Select, obtain, order, pre-anesthetic medication or treatment related to the care of the patient with a physician's co-signature and seek consultation when appropriate                                                                                                                                        |                 |                |                   |
| Administer pre-anesthetic medication or treatment related to the care of the patient                                                                                                                                                                                                                           |                 |                |                   |
| Select, obtain, or administer the anesthetics, adjuvant drugs, accessory drugs, and fluids                                                                                                                                                                                                                     |                 |                |                   |
| Evaluate patient response during emergence from anesthesia and institute pharmacological or supportive treatment to ensure patient stability during transfer                                                                                                                                                   |                 |                |                   |
| Obtain, prepare, and use all equipment, monitors, supplies, and drugs used for the administration of anesthesia and sedation techniques, Perform and order safety checks as needed                                                                                                                             |                 |                |                   |
| Perform all aspects of airway management, including fiberoptic intubation                                                                                                                                                                                                                                      |                 |                |                   |
| Perform and manage regional anesthetic techniques including, but not limited to, subarachnoid, epidural, and caudal blocks; plexus, major, and peripheral nerve blocks; intravenous regional anesthesia; transtracheal, topical, and local infiltration blocks; intra capsular, intercostal, and ocular blocks |                 |                |                   |
| Provide appropriate invasive and non-invasive monitoring modalities utilizing current standards and techniques                                                                                                                                                                                                 |                 |                |                   |
| Recognize abnormal patient response during anesthesia, select and implement corrective action, and request consultation whenever necessary                                                                                                                                                                     |                 |                |                   |
| Initiate acute post anesthesia pain management techniques                                                                                                                                                                                                                                                      |                 |                |                   |
| Initiate and administer respiratory support to ensure adequate ventilation and oxygenation in the post anesthesia period                                                                                                                                                                                       |                 |                |                   |
| Discharge of patients from a post anesthesia care area in accordance with policy                                                                                                                                                                                                                               |                 |                |                   |

### Acknowledgment of Practitioner

I have requested only those privileges which by education, training, current experience, and demonstrated performance I am qualified to perform, and for which I wish to exercise at this center. I further understand that:

- A. Privileges requested may differ from those granted and approved;
- B. Completion of this form, at the present time, does not preclude me from requesting additional privileges in the future;
- C. The granting of clinical privileges will be made in conformance with the applicable Medical Staff Bylaws and Policies and Procedures;
- D. Failure to obtain and maintain all threshold criteria set forth above, or non-compliance with the applicable Medical Staff Bylaws or Policies or Procedures, may constitute grounds for non-renewal or restriction/limitation of clinical privileges.

## Medical Director Declaration

The practitioner's request for new, modified, or renewed clinical privileges has been reviewed by the Center's Medical Director or an appropriate member of the Medical Executive Committee and presented to the Governing Board for approval. Privileges that have received a checkmark in the designated column have been granted. Any privileges that were requested but not granted are listed below, along with an explanation for each determination.

Medical Director: Michael A. Gorin, M.D.
